

ROLES	<i>Note: These aren't engraved in stone. This is more so for you guys to be able to distribute the workflow more easily and evenly so don't take it too literally.</i>																																																
F1: Tokenomics & Incentive Modeling	Designs the token supply, incentives, staking mechanisms, and overall economic framework that drive user behavior and value within the BuckeyeCoin ecosystem.																																																
F2: Financial Research & Distribution Strategy	Conducts research on token distribution plans, pricing models, and risk management strategies to ensure a balanced and fair token economy tailored to campus use cases.																																																
F3: Analytics & Documentation Lead	Collects and analyzes token transaction data, monitors economic metrics, and produces clear documentation for the team and stakeholders to understand token performance and project progress.																																																
CS1: Smart Contract & Deployment Developer	Codes the BuckeyeCoin smart contract on the chosen blockchain testnet, implements token features per the tokenomics design, handles deployment, and assists in testing and integration with frontend or wallet tools.
